SEG Graphic Installation in 3 Steps

The Perfect Fit

STEP 1: Attach Corners

Always insert graphic into each alternate corner, then into the sides of the frame. Otherwise the graphic will not fit into the frame correctly.

Insert narrow side of silicone welt into the channel at corner 1, with fabric to the outside. Repeat for opposite corner 2, then corner 3, then corner 4.

STEP 2: Attach Middle

Once corners are attached, press the middle of edge 1 into the channel. Then press middle of edge 2 into the channel on opposite side. Repeat with edge 3 & 4.

STEP 3: Attach Sides

Once the middle of sides are attached, fully press the silicone welt into the channel, between center and corner at location 1. Repeat the process between center and corner at location 2.

Do the same for welt on opposite side, at locations 3 & 4. Then repeat for locations 5 & 6 and 7 & 8.

To remove graphic from the frame, locate the fabric pull tab. Gently pull on the tab to remove the graphic.
